Adopt Professional (Meanwell) DC Module

- EMC compliance
- High efficiency
- Over current protection, short-circuit protection
- Self-recovery function

PTC Heating Units

- Significantly reduced risk of fire, long service life
- 3 groups of heating units running in parallel, triple guarantee
- Low risk of current leakage

Display

- Large LCD screen + LED Indicator
- Colour screen, good resolution
- More information on display

Adopt Low Air Flow

- Better warming performance
- Less influence to laminar in theatres

Digital Sensors in Hose

- More accurate
- No need for calibration by end user

Double Layer Filter

- Initial filter + HEPA filter
- Bigger filtration area

Firmware Upgrade

- On-site firmware upgrade possible

Power Cord

- US
- UK
- EU
- South Africa
- China
- Brazil

Customised Blower

- DC power drive
- Heat-resistant ABS plastic shell
- Customised copper axis, longer running life
- Lightweight
- PWM regulator with adjustable blower speed

Fuse System

- Dual stages fuses system
- Working & standby fuses
- Easy to replace without disassembling the unit

Fixation Design

- Bedside hook (stainless steel)
- Infusion rack hook (aluminium alloy)
- Air hose clamp (aluminium alloy)

Air Hose Cover

- Air hose cover available
- Easy to clean

Rolling Stand

- Two different heights
- Easy to install and use

Small Size & Lightweight

- Easy to carry and store

EMC

- Passed the latest EMC standard, IEC 60601-1-2:2014

Air Flow Comparison

<https://infiniummedical.com/contact>

The IOB Warming Unit's exhaust volume is 58% more efficient than its nearest competitor, which has a much lower effect on the laminar system in theatre.

1.28%

IOB Warming Unit only accounts for 1.28% of the air flow rate in the operating theatre.

Calculation of Air Flow in a 40m² Operating Theatre

The air flow rate of the IOB Warming Unit only accounts for 1.28% in a 40m² operating theatre. In a well ventilated room, 63.2% of the air will be replaced after an hour.

Features & Benefits

What Sets Us Apart?

Safe Heating Modules and Safe Probes stabilise and lower temperature on heater surface (about 130°C).

 Vertical structure design for key components

 Reducing transverse displacement vibration

 ABS fire protection shell

 Hardware is made of stainless steel and aluminium alloy to improve corrosion resistance

IOB Warming Unit

Safe Heating Modules

1. Significantly reduced risk of fire, long service life
2. 3 groups of heating units running in parallel, triple guarantee
3. Low risk of current leakage

Safe Probes

1. Digital sensors are more accurate
2. Calibrated by sensor manufacturer
